

For the Moms!

Saifil Ali, Josiah Egner, Shawn Jafari, John Austin
Moreno, Landon Prewitt

Outline

- Project Information
 - Purpose
 - Client Expectations
- Demo & Status
- Bugs / Remaining Work
- Tools and Environments
- Team Organization
- Words of Wisdom
- Problems Solved

Project Information

- **Purpose:** To enhance the client's outdated boot website and provide functionality to sell boots online
- **Expectations:**
 - Visually appealing
 - Showcases products sold by the Aggie Moms' club
 - Online sale of products (if possible)
 - Must be compatible with Square credit card reader

Demo & Status

Original:

<http://www.aggie-mom-boots.com/>

Iteration 3:

<http://aggie-mom-boots.herokuapp.com>

Current Status:

<https://protected-shore-58764.herokuapp.com/index>

Bugs / Remaining Work

Bugs:

- Images in gallery need to be rotated 90° counter-clockwise

Remaining Work:

- Displaying reviews for products
- Adding products to Square Marketplace
- Possible administrator webpage to control site functions

Tools and Environments

- Cloud 9 - development environment
- GitHub - repository and version control
- Pivotal Tracker - user story management
- Rspec and Cucumber - testing
- Google Drive - storing all documents
- Heroku - app deployment / hosting
- GroupMe - group communication
- Good Ol' Fashioned Email - communicating with the client

Team Organization

- Scrum Master - Shawn Jafari
 - Product Owner - Josiah Egner
 - Developers - Saifil Ali, Josiah Egner, Shawn Jafari, John Austin Moreno, Landon Prewitt
-
- Team consistently met every Monday and Wednesday at 3:00 P.M.
 - Occasional pair programming, but a lot of solo work due to different schedules

Words of Wisdom

- Change your gemfile to use postgresSQL for production to run on Heroku
- Communicate with your team whenever anything happens
- Look at pictures of puppies for emotional support

Problems Solved

- How to get database to work on Heroku?
- How to add store functionality and gather credit card information securely?
- How to make sure non-technical clients can continue to use the project after development has ended?

Questions?
