For The Moms Iteration 4

Pivotal Tracker: <https://www.pivotaltracker.com/n/projects/1980729>

Github: <https://github.tamu.edu/jam-313/CSCE431-GroupProject>

Heroku Deployment: <http://aggie-mom-boots.herokuapp.com/>

Feedback from Iteration 3: The moms have constantly been supportive of our efforts. They thoroughly enjoy the website. The admin panel is a go and so is the reviews controller. This is good news!

To run our cucumber tests: in the console type in cucumber or rake cucumber:all
Or use the run_test.sh that Josiah has provided

To run our Rspec tests: Use the run_test.sh that Josiah provided OR if that doesn't work, read the "notes_on_rspec" in the project.

Happy paths include login success, tests being able to find pictures and correct page information
Sad paths include login failures

User Stories information:

Main Website Page - completed

About Us Page - completed

FAQ Page - completed

Gallery Page - completed

Purchase Page renamed Products Page - completed

We were able to implement all the user stories we wanted for this iteration! :)

We added the ADA compliancy story. Americans with Disabilities Act: content should be accessible to all audiences regardless of any impairments they may have

Customer meeting to demo: 4/30/2017

Start of Scrum 4/17/2017:

Format: **What they will be doing**, *What they accomplished*, Roadblocks

4/17/2017

Saif, Landon

- A note: Saif and Landon have already implemented the Square API into the page, but now they are doing it dynamically
- **Working on implementing dynamically Square API into page**

Josiah

- **Emailed the customer**

John Austen

- **Working on Gallery Page bug fixes, then RSpec testing**

Shawn

- **Starting Scrum Notes, waiting to hear back about Admin Login and stuff**

4/18/2017

Saif, Landon

- **Working on implementing dynamically Square API into page**

Josiah

- **Emailed the customer, working on bug fixes as well as code reviewing.**

John Austen

- **Working on Gallery Page bug fixes, then RSpec testing**
- Possible Ruby implementation gone wrong?

Shawn

- *Approved John Austen's Rspec testing on the Admin_Panel branch*
- **Finishing up SCRUM notes, updating UML**

4/19/2017 No Scrum Meeting

4/20/2017

Saif, Landon

- **Working on implementing dynamically Square API into page**
- *Got scraping of data from page to work a little bit*
- For some reason, the data is encryped on each Square page, we might not be able to scrape the necessary products

Josiah

- **Emailed the customer, working on bug fixes as well as code reviewing.**

John Austen

- **RSpec testing and working on Cucumber testing of Gallery page**
- *Finished Gallery page bugs*

Shawn

- *Wrote some SCRUM notes*
- **Finishing up SCRUM notes, updating UML**

4/21/2017

Saif, Landon

- **Working on implementing dynamically Square API into page**
- *Got scraping of data from page to work entirely!! Good news*

Josiah

- **Waiting to hear back from customer. Working on Google Drive picture implementation**

John Austen

- **RSpec testing and working on Cucumber testing of Gallery page**
- *Finished Gallery page bugs*

Shawn

- *Wrote some SCRUM notes*
- **Finishing up SCRUM notes, updating UML**

4/22/2017

Saif, Landon

- **Have 80% finished implementing Square API**

Josiah

- **Heard back from Customer, we are now implemented admin panel and reviews**

John Austen

- **RSpec testing and working on Cucumber testing of Gallery page**
- *Pushed Gallery to Master*

Shawn

- *Wrote SCRUM notes*
- **Finishing up SCRUM notes, updating UML**

4/23/2017

Saif, Landon

- **Have 85% finished implementing Square API**

Josiah

- **Working on pull requests that are being merged**

John Austen

- **RSpec testing and working on Cucumber testing of Gallery page**

Shawn

- **Finishing up SCRUM notes, updating UML, updated Pivotal tracker**

4/24/2017

Saif, Landon

- **Have 90% finished implementing Square API**
- Minimum width of products is set to 200px because Square wants so

Josiah

- **Working on seeding users, adding a Disclaimer controller or possible Admin Tab on navbar**

John Austen

- **RSpec testing and working on Cucumber testing of Gallery page**

Shawn

- *Merged Admin_panel into master, contains reviews and admin login, updated Pivotal Tracker, updated UML*
- **Finishing up SCRUM notes, helped Josiah with seeding**

4/25/2017

Saif, Landon

- *Finished the dynamic implementation of Square API page, Landon fixes the Square API minimum width issue*

Josiah

- *Finished seeding users, added admin panel, added disclaimers controller*
- **Worked on numerous pull requests**

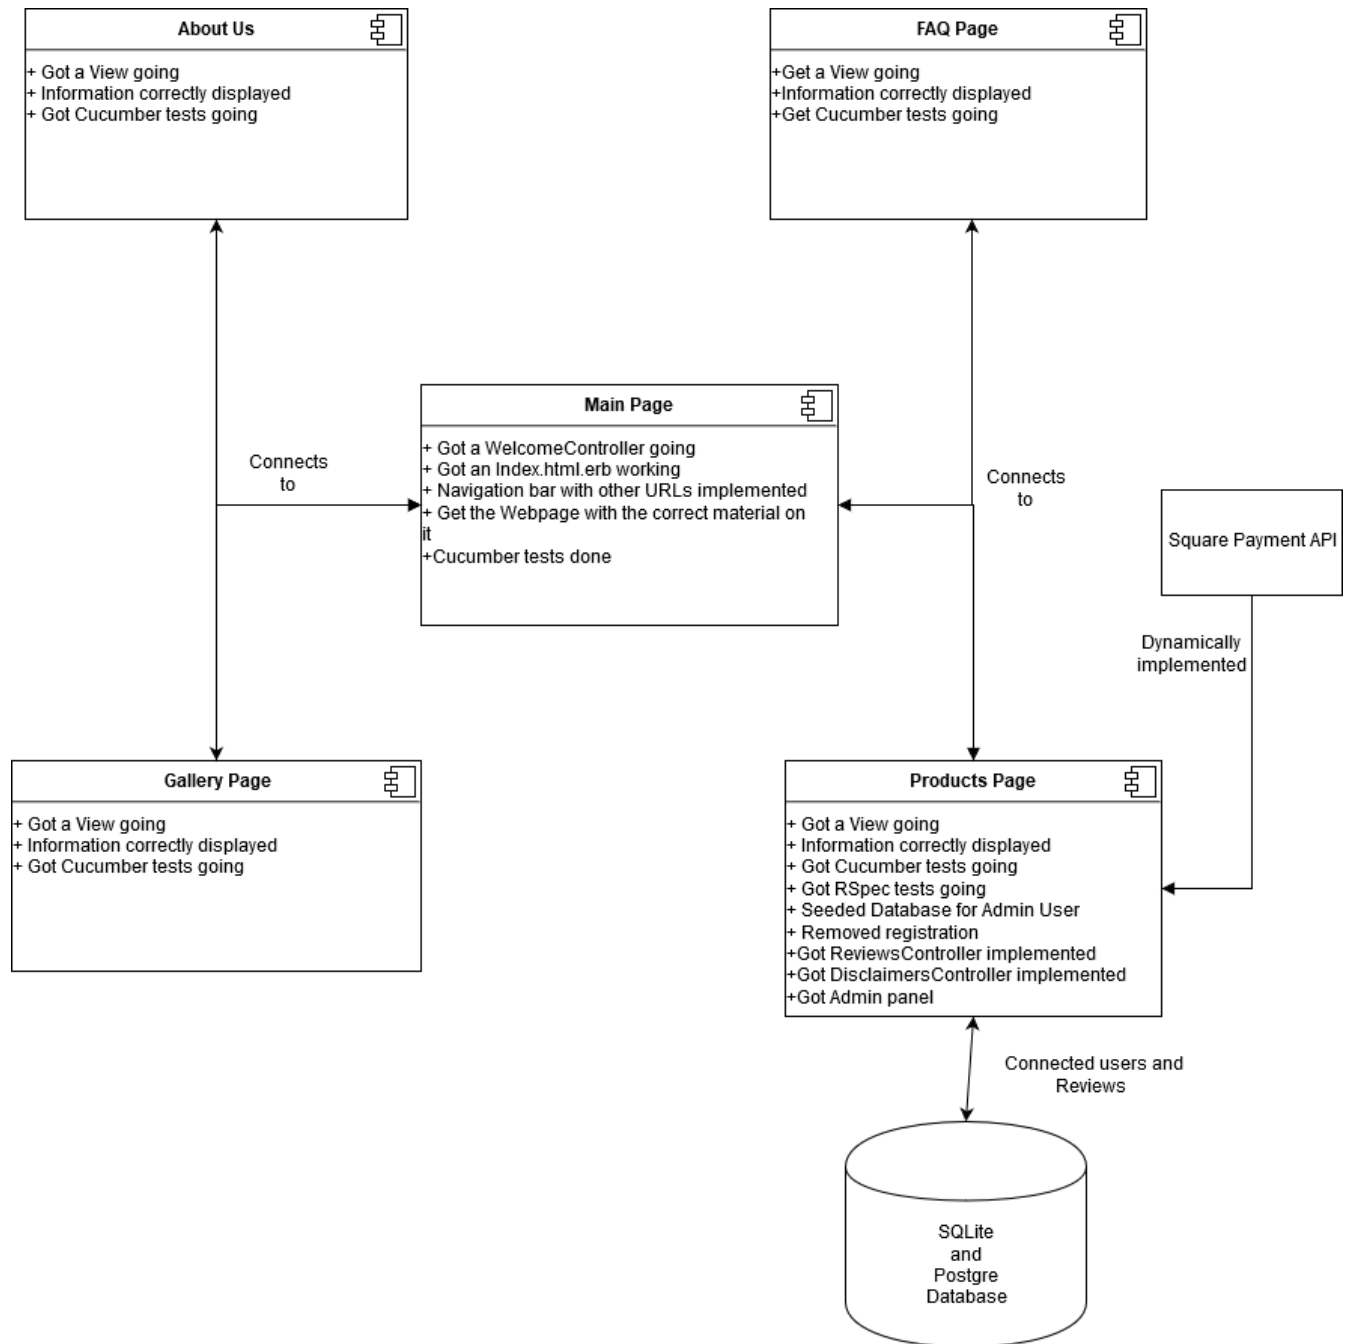

John Austen

- *Finished Rspec and cucumber tests*

Shawn

- *Finished SCRUM Notes, turned in Iteration 4*
- **Implemented some RSpec tests**

UML Diagram

What has been added to the UML diagram:

Dynamically implemented Square Payment API

Database connections and seeding are set up

Implemented Reviews and Reviews Controller as well as Admin Login and Disclaimers Controller

Got RSpec and Cucumber Testing
