Saifil Ali
John Austen Moreno

For The Moms Iteration 2

Pivotal Tracker: <https://www.pivotaltracker.com/n/projects/1980729>

Github: <https://github.tamu.edu/jam-313/CSCE431-GroupProject>
(*might* have to look in the main_page branch)

Heroku Deployment: <http://aggie-mom-boots.herokuapp.com/>

Note: No TDD is being done due to the current iteration being primarily View based and not having any model/controller information

Feedback from Iteration 1: The website looks great and the moms are loving it! No complaints and no negative feedback so far.

To run our cucumber tests: in the console type in cucumber or rake cucumber:all
Or use the run_test.sh that Josiah has provided

We do not have any sad paths due to the simplicity of our project

User Stories information:

Main Website Page - completed
About Us Page - completed
FAQ Page - completed
Gallery Page - nearly completed

We were able to implement all the user stories we wanted for this iteration! :)

We added the ADA compliancy story. Americans with Disabilities Act: content should be accessible to all audiences regardless of any impairments they may have

Customer meeting to demo: 3/31/2017

Start of Scrum 3/20/2017:

Format: **What they will be doing**, *What they accomplished*, Roadblocks

Did not do work on Spring Break

3/20/2017

Landon

- **Is completing the About Us Page and writing cucumber tests**
